Policies indicator High impact on score

100/100

A policy is a set of objectives that addresses specific sustainability issues. It shows a company's intention to reduce impact, mitigate risk or improve performance.

Strengths

Standard policy on a majority of environmental issues

A standard environmental policy includes commitments and/or operational objectives on the main labor and human rights risks the company faces.

Details

A comprehensive environmental policy includes commitments and/or operational objectives on the majority of labor and human rights risks the company faces, and integrates quantitative objectives (i.e. targets) on those risks. It is also mandatory for the policy to incorporate some of the following elements: scope of application, allocation of responsibilities, and/or a formal review process. Policies are deemed exceptional when all labor practice and human rights issues are covered by qualitative and quantitative objectives, in addition to all of the aforementioned elements.

Analyst comment

Lorem ipsum dolor sit amet.

Environmental policy on energy consumption and GHGs

Environmental policy on water

Improvement Areas

The EcoVadis Academy offers a practical course in Environmental Policies

[Go to course](#)

High priority Inconclusive documentation for policies on materials, chemicals & waste

[Start corrective action](#)

Medium priority Inconclusive documentation for policies on biodiversity

[View progress of corrective action](#)

Low priority No quantitative target on environmental issues

[Scoring Principles for \[X\]](#)

Endorsements indicator Low impact on score

0/100

Endorsements are your company's public adherence or commitment to meeting objectives and principles defined by a recognized third-party organization.

Measures indicator High impact on score

75/100

Measures are your company's actions to support your sustainability policies and commitments.

Certifications indicator High impact on score

75/100

Certifications confirm your compliance with international standards (for example, ISO 14001). They must be issued by an external certification body.

Coverage indicator Multiplying factor

100/100

Coverage means the level of deployment of measures and certifications throughout your company. It's a multiplying factor. The higher it is, the higher score will be given to the Measures and Certifications indicators.

Reporting indicator High impact on score

25/100

Reporting is based on quantitative KPIs that measure your implementation of sustainability practices.

360° Watch Findings indicator High impact on score

25/100

The 360° Watch Findings indicator is scored based on the data we gather by scanning thousands of sources in the public domain. This allows us to get a broader overview of your company's sustainability management.
